*July 28, 2014. Decatur, IN:* The US Military Vets Motorcycle Club NY4 shirted, from NY to PA to OH to IN, for 700 miles the thunder, lightning, tornado watches, torrential rains of yesterday's storm front crossing America to arrive safely in Decatur, IN, after only a drenching in the last 30 miles, yesterday evening. The veterans are riding out to Fargo, ND, for the USMV MC National President's Meeting, then on to Sturgis, SD, and back home – a 4300 mile run to raise awareness, hope, and funds for veteran healing initiatives named “*Riding For Our Lives: Preventing Veteran Suicides.*” “Let's get our veterans taken care of!” declares USMV MC NY4 President Bill “Bomber” Barber.

*Riding For Our Lives* is joined in Fargo, ND by national comedian and Navy veteran PJ Walsh of *GIs of Comedy* and *Courage Continues At Home IV*, with guest Mark Riccadonna of *Armed Forces Entertainment* and M.C. The riders thank Pepsi & Budget & everyone for their support. 700 miles into the first leg of *Riding For Our Lives*, the odd coupling of the USMV MC NY4 and an arts organization, is led by H. G. Fairfield Arts' Founder, Kathie Freston (USMCR 1953-64). Kim Blacklock, Pres. H. G. Fairfield Arts and Support Truck driver states: "The power of arts and culture as economic engines, healing engagements, and community builders is glue for us humans. Having one of the oldest living female Marines for a boss means we get things done. The old Community barn raising is what we can apply to getting our veterans taken care of. Comedy Shows and other events can help raise the funds and the awareness of how to get things done. The discipline of the USMV MC is exemplary in revealing how veterans continue to serve our communities and it works with HGF's motto is "See a Need; Fill it."

"It all fits together when there is a common focus. *Semper Fi Odyssey* is a perfect example of what works, which is why we are benefitting and also bringing attention to MGen T.S. Jones' great program free to wounded discharged veterans and life changing. The goal is to help our returning veterans reintegrate into civilian life successfully. Arts, Culture, Science, Compassion, Communities, and Work can move mountains;" says the 6'7" CEO of H.G. Fairfield Arts organization; "My dad is a 280" lb Samoan veteran of the Korean War & US Army. We got up to breakfast calls of "Front & Center!" You learn how to get things done in a military influence. We must take care of our veterans if the companies who use them won't and the VA & Government can't because of money or care standards or out sourcing our VA Medical Centers to private companies, or whatever the cause: they are our family members and together we can figure care out by enlisting those in our communities with the skills. That's what Riding For Our Lives is doing; preventing veteran suicides by caring."
